EXPERIENCE

QTS Rotational Program Associate (Front-End Developer), *RBC Capital Markets*

Jul 2025 – Present

- Building an information management framework to streamline credit processes serving Global Credit, Corporate Banking, and Wealth Management
- Developing React-based UI components for credit approval workflows, automation of client relationship structures, and compliance processes
- Modernizing a legacy Java client-server application into a web experience using React, JavaScript, CSS, and HTML
- Collaborating closely with business stakeholders and UX designers to translate credit process requirements into features

Software Engineer Intern, *RBC Capital Markets*

Sep 2023 – Apr 2024

- Contributed to a risk technology component using Java, Spring Boot, and GraphQL, gathering requirements from front-office traders and risk engine teams to define data contracts and improve data exchange between systems
- Established automated testing with Jest across the full stack, improving product quality and reducing regression issues during release cycles

Software Engineer Intern, *RBC Capital Markets*

Jan 2023 – Aug 2023

- Coordinated across back-end engineers, UX, and business partners to define the modernization roadmap for a legacy Java desktop application, aligning technical decisions with user needs and business priorities
- Triaged and resolved front-end bugs across the application, improving product stability and reducing reported issues during the migration

Business Insight Data Analyst, *TD Bank – Canadian Credit Cards*

Aug 2021 – May 2022

- Delivered 5+ monthly data insight reports using SQL and Python, monitoring 20M credit card customers and identifying trends that reduced remediation costs by 12%
- Led delivery meetings with Product, Incident Management, and Audit stakeholders, translating technical findings into actionable recommendations during incident investigations

Senior Analyst, *TD Securities – Corporate Lending Office*

Mar 2018 – Aug 2021

- Spearheaded automation of the trade cycle on LoanIQ, reducing processing time by 30%; awarded 2020 Q4 Legendary Award (top 1% of employees) for driving cross-functional collaboration on loan system upgrades

EDUCATION

Bachelor of Computer Science, *University of British Columbia*

Apr 2025

GPA: 81%

Bachelor of Commerce (Finance), *Rotman Commerce, University of Toronto*

GPA: 3.59 / 4.0, High Distinction

SKILLS

Technical: Python, Java, JavaScript, TypeScript, SQL, React, Spring Boot, GraphQL, Node.js, Git

Domain: Capital markets, credit products, corporate lending, risk technology, regulatory environments

PROJECTS

RBC Direct Investing – App Improvement Prototype, [PRD](#) | [GitHub](#) | [Demo](#)

2025

- Identified three friction points in the RBC Direct Investing mobile app through competitive analysis (Wealthsimple, Bloom) and user research; authored a PRD with problem statements, evidence, risks, and success criteria
- Designed and built a working iOS prototype with a unified account dashboard, interactive portfolio allocation chart, and auto-invest feature using SwiftUI and a Spring Boot backend

TikTok Analytics Platform, [GitHub](#)

2025

- Built a full-stack analytics platform (React, Spring Boot, PostgreSQL, Redis) using agentic AI-assisted development, reducing content ideation from hours to seconds via engagement velocity scoring and Claude API
- Drove product end-to-end from requirements through deployment, designing data ingestion pipelines, A–F performance benchmarking, and an AI-powered recommendation engine
